

Granite Mechanical Components

Granite mechanical components are made of high quality black natural granite. UNPARALLELED searched many mines in the world, and found two kinds of black granite with stable physical properties and beautiful cut color --- Jinan Black Granite and Indian M10 Black granite. These two types of granite have stable physical properties and a density of 3030-3100kg/m³, which is a rare material for making precision mechanical components.

PRODUCT DETAILS

UNPARALLELED

Granite mechanical components are made of high quality black natural granite. UNPARALLELED searched many mines in the world, and found two kinds of black granite with stable physical properties and beautiful cut color --- Jinan Black Granite and Indian M10 Black granite. These two types of granite have stable physical properties and a density of 3030-3100kg/m³, which is a rare material for making precision mechanical components.

The material chosen by UNPARALLELED is granite not marble. At present, many manufacturers choose low-priced marble to deceive customers. Because customers do not understand the difference between granite and marble, and it is difficult to distinguish from the color of the stone, most customers still do not understand this product. Many customers may have questions, marble and granite are both stones, what is the difference? The difference can be big:

1. In terms of price, the price of granite is very expensive, and the price of marble is very cheap.
2. Granite is hard and marble is soft.
3. The physical properties of granite are stable and can maintain high precision; the physical properties of marble are not as good as granite, and the precision is easy to change.. .

In summary, granite is a good material for making precision mechanical components. Many manufacturers use cheap marble to pretend to be granite, thereby earning high profits. Many customers will ask how to choose granite instead of marble?

1. Ask the supplier to provide a stone analysis report.
2. Look for the UNPARALLELED brand.
3. The customer is required to provide corresponding stone photos, and the stone surface is not oiled or painted, and the color of the stone itself is retained. The color of the marble surface after manual grinding is different from that of the ground granite surface.

UNPARALLELED Ceramic Straight Ruler Application:

- Straightness measurement of machine tool table surface
- Parallelism measurement of machine tool clamp surface
- Flatness measurement of table
- Working accuracy measurement on machining centers
- Accuracy inspection of double column type surface grinding machines
- Accuracy measurement of planer machining
- Surface shape measurement, etc. of lapping machines

OVERVIEW

UNPARALLELED

BRAND	UNPARALLELED	MATERIAL	Al ₂ O ₃
APPLICATION	CMM, Semiconductor CNC, Laser	DENSITY	3070kg/m ³
CONDITION	NEW CUSTOM	COLOR	Pure Black
ORIGIN	Jinan, CHINA	PRECISION	1μm
WARRANTY	1 YEAR	STANDARD	DIN, GB, ASME, JIS...
PACKAGING	Custom Export Package	CERTIFICATE	ISO9001, CE...
PAYMENT ITEM	T/T, LC...	KEY WORD	Granite Component
MATERIAL ORIGIN	Jinan city, China	TECHNICAL SUPPORT	Inpsection & Calibration & Assembly
PRICE	EXW, FOB, CIF, DAP, CPT...	SERVICE	Design drawings

FAQ

UNPARALLELED

1. Who are we?

UNPARALLELED starts 1896, has the most advanced measuring and inspection equipment. We can manufacture a variety of ultra-high precision mechanical components for high-end machines.

2. What material does UNPRALLELED choose?

Nature Black Granite.

3. Why should you buy from us?

Only UNPARALLELED can offer warranty of 1 year for the precision of each product.

4. We want to purchase one set this time, is this ok?

OK.

5. Does UNPARALLELED offer Authoritative Inspection Report?

UNPARALLELED has the most advanced measuring devices.

UNPARALLELED all measuring equipment have the calibration report.

More information please contact: info@unparalleled-group.com

SERVICES

UNPARALLELED

- 1.Any inquiries will be replied within 24hours
- 2.Professional manufacture,welcom to visit our factory.
- 3.OEM/ODM available:
 - (1)Paint logo on the product.
 - (2)Customized product according your drawings.
- 4.Any your idea on product we can help you to design and provide drawings.
- 5.High quality,practical designs,reasonable & competitive price, fast lead time.
